Nadine NERGUISIAN,
Programme officer,
Ministry of national education
Ministry of higher education, research and innovation
France

After having had a four years' experience as responsible for the development of partnerships with professional branches and large companies at the Secondary school Directorate of the French Ministry of education, higher education and research, I became responsible of the "Education and vocational training" and "Educational guidance" areas at the European Union and Multilateral Affairs Department. Here, I contribute to the coordination, the positioning and the representation of the Ministry in the European and multilateral working groups and institutions which are focused on educational guidance, education and vocational training - such as CEDEFOP, ETF, ESCO, Europass, Euroguidance and TWG ET2020. After my master in Economics, I worked several years in the private sector and then I served for three years as teacher and then for more ten years as teacher training advisor in the adult professional education sector (Greta), where I supported young adults and job seekers and I provided professional development for employees both in the public and private sectors.
