- Proposal TF
- Guide on using administrative data!

1. serve a well-established strategic policy objective that puts the learners’ rights to high quality, relevant and efficient education and training in the centre of the process
2. be underpinned by a quality assurance system
3. target to meet the labour market and societal needs at the national, regional and/or local level
4. respect data protection rules and ensure confidentiality for individual VET graduates
5. be based on methodologically sound and sustainable data collection systems which facilitate data analysis
6. be linked to data collection approaches used in other educational sectors at the national and international level

Erasmus+ call announcement

EUR 1.3 million in 2019 for capacity-building in graduate tracking!

...As follow-up to the Recommendation on tracking graduates and the pilot European graduate survey launched by the Commission in 2017 in order to improve the availability of comparable information on graduate employment and social outcomes, 2019 will see the start of preparations for a further roll out of the survey to more EU countries. The programme will further support the development of national graduate tracking mechanisms through knowledge sharing and capacity building as well as through the work of a network of experts in graduate tracking...
