14:00 - 16:00 SESSION 3 - ACTION: WHAT SKILLS FOR THE FUTURE?

Generation of ideas

Education and training remain fundamental elements not only to grant that young people enrol in programmes that are "future-ready", but also to ensure further dynamic learning. However, a reflection on the changing role of education and training in empowering individuals to cope with change is needed, given its role as a vehicle for permanent adaptation of people's skills and lifelong learning. At the same time, news solutions are needed to enable firms to find or co-create the skills they need for their adaptation to new opportunities.

Starting from the conclusions of the 2018 ETF global conference "Skills for the Future: Managing Transition", this session explores the actions that countries need to take to provide people with the right skills for the world of tomorrow, and manage their transitions towards uncertain futures. Recommendations and ideas are introduced by speakers. They are then followed by group work to propose specific project ideas to put actions in practice.

This final session is open to reflections of participants on the policy implications of what discussed during the day. As such, it calls for an open exchange of views among practitioners and experts, especially in relation to the steps needed to brace for the future and for change in the Mediterranean region. The outcome document based on the exchanges of the day is discussed and finalised.
