

AGENDA

Skills Lab Network of Experts meeting on green transition

Skills for the green transition

SUMMARY:

Last year's climate events, the recent launch of the Green Deal and the COP26 have all helped the issue of climate change gain political traction. This is also the case for the neighbourhood region where we observe clear shifts away from the linear economy and education and training systems are taking steps to ensure sustainability is at the heart of learning programmes. ETF will continue to research the links between education, work and the green transition in this region and we hope to collaborate with you. This event will be an occasion to share knowledge and discuss this year's collaborations on this topic.

Moderator: Daniela Clara, ETF

| Time | Agenda Item | Owner |
|---------------|---|--|
| 10:00 - 10:05 | Opening remarks | Manuela Prina, Francesca Rosso (ETF) |
