

# AGENDA

## ETF NETWORK FOR EXCELLENCE

## PROCESSES & KEY PRACTICES OF COVES FOR ADVANCING AUTONOMY & PUBLIC-PRIVATE PARTNERSHIPS (PPPs)

KEY IMPLICATIONS AND FINDINGS OF THE ETF STUDY.

COUNTRY EXAMPLES.

ONLINE ZOOM

9 FEBRUARY 2023 H 10.00 - 11.45 CET

EVENT SUMMARY WITH OBJECTIVES

This event closes a three-year activity in the field, for increasing understanding, as well as providing in-depth and up-to-date knowledge on excellence in **building relationships with the private sector**.

Partnerships facilitate companies' role in ensuring that students' training meets companies' needs, as students can potentially become their employees. Partnerships also open up research and development possibilities with CoVEs. Furthermore, joint initiatives provide opportunities for image-building and generating positive publicity. Then, **how to set up broader collaborations between public and private actors in response to the needs and challenges faced by CoVEs? What process and key practices to put in place?**

The webinar will answer those questions by presenting key implications and findings of a recent [study conducted by the ETF](#) in the field. **Challenges and lessons** will be guiding the debate, with the support of **countries' examples**.

This event also aims to support the future dialogue regarding PPPs between TVET, policy-making bodies and the private sector.

## AGENDA

Moderator: Floriana Folisi, ETF
