

#### EU policies on adult skills development

**ETF Peer-Learning Seminar** 

## Our context – Changing labour markets

Atypical forms of work

More frequent professional transitions

Shifting employment between sectors

Shifting skills needs

Demographic changes

European companies are grappling with a **shortage of staff** [...] Both low-end and high-end. We need everyone on board.

We need much more focus in our investment on professional education and upskilling.

We need **better cooperation** with the companies, because they know best what they need.

And we need to match these needs with people's aspirations.

But we also have to **attract the right skills** to our continent, skills that help companies and strengthen Europe's growth [...] we need to speed up and facilitate the **recognition of qualifications** also of third country nationals [...]

This is why I am proposing to make 2023 the European Year of Skills

## Why a European Year of Skills?

The Year would promote a mindset of reskilling and upskilling

- boosting **competitiveness** of companies (in particular SMEs),
  - realising the digital and green transitions in a socially fair, inclusive and just manner

#### **Attracting people**

Attracting people from third countries with the skills needed by the Union

#### **Matching aspirations**

Matching people's aspirations and skills-set with labour market opportunities

#### Skills relevance

Strengthening skills relevance by close cooperation

#### Investment

Increased, more effective and inclusive investment
