

AGENDA

Forum on Vocational Excellence 2023 and GRETA meeting

Providing today's talent with the skills to build a great tomorrow

SUMMARY:

The present Agenda introduces the programme of two inter-related meetings: Forum on Vocational Excellence 2023 organised by the Community of Practice of Centres of Vocational Excellence taking place on 25 and 26 September and GRETA meeting (Greening Responses to Excellence through Thematic Actions) organised by the European Training Foundation (ETF) on 27 September.

Education and training (VET) providers, employers and governments have a shared responsibility to make sure the skills our workforce acquires are up to date with the latest needs and demands of society. This means curricula need to be revised regularly, both in terms of content and form, and new skills, like green skills, digital skills will be added. Furthermore, social and professional skills to work across boundaries of the own sector, the own country and the own type of profession are paramount to be able to address the complex society challenges. Thirdly, applied research and innovation in VET are incredibly important to share the latest developments with small and medium enterprises (SMEs) in the skills ecosystems, find proof of concepts for companies and stimulate the green and digital transition in our societies.

This is a huge challenge, but luckily there are many good examples of how VET providers, the labour market and governments have joined forces through the CoVEs in co-creating solutions that do exactly what is needed: offering good quality education and training, in line with society's needs, and offering additional services like applied research, innovation of professions and sharing context rich learning environments that are used for initial and continuous education and training alike.

During this Forum on Vocational Excellence, we will focus on these inspiring examples, bringing together the people involved, so they can share their knowledge, lessons learned and best practices with each other, so no one has to reinvent the wheel!

ETF is contributing to the Vocational Excellence Forum by sharing results of its two projects:

- 1) **International Dimension of the Centres of Vocational Excellence: Building a strong international cooperation dimension on Vocational Excellence**, funded by the European Commission, in particular, international self-assessment tool for CoVEs, concept and process of quality label and award on vocational excellence, findings of the study on the role of CoVEs in applied research. This will be presented at the workshop on 26 September [Round 1: Support services for CoVEs - part 1](https://coveves.eu/round-1-support-services-for-coves-part-1) (coveves.eu)

- 2) Thematic initiative GRETA (Greening Responses to Excellence through Thematic Actions) -meeting on 27 September.

GRETA is one of the thematic initiatives of the ETF Network of Excellence (ENE) and it promotes knowledge sharing, peer learning and collaboration of **CoVEs and VET providers** with a view to support their provision of green skills.

GRETA's **whole institutional framework** sets methodological frame for greening of VET around **five dimensions**: 1) Strategies for going green 2) Providing green skills throughout the curriculum 3) Enabling teachers and trainers to promote green skills 4) Collaborating on green initiatives with outside stakeholders 5) Funding green initiatives.

ETF GRETA meeting

Wicked Ground – meeting rooms The Space

(Address: Generaal Vetterstraat 55 1059BT Amsterdam)

Within ETF Network of Excellence (ENE), the green VET initiative, GRETA – Greening Responses to Excellence through Thematic Actions – focuses on skills development and supports the greening of VET as response to the green and digital transitions.

We take the opportunity to meet with the core group of CovEs that have followed GRETA since October 2021.

We will update each other on the state of greening activities and take a close dive into the GRETA report 'Greening vocational education training. Processes, practices and policies'.

Jointly we will exchange on the key building block for greening CoVEs and how to move forward based in the policy recommendations in the GRETA report.
