International commitments

UNESCO OECD Eurostat (UOE) joint data collection

Eurostat

UOE data on education and training cover the main features of learning activities

- the participation of individuals in education and training activities;
- education financing and teaching staff;
- outcomes of education; and
- learning mobility and foreign language learning.

It covers the following aspects

- pupils and students enrolled and new entrants
- graduates
- student mobility
- education personnel
- education expenditure
- language learning.

Current issues – an example

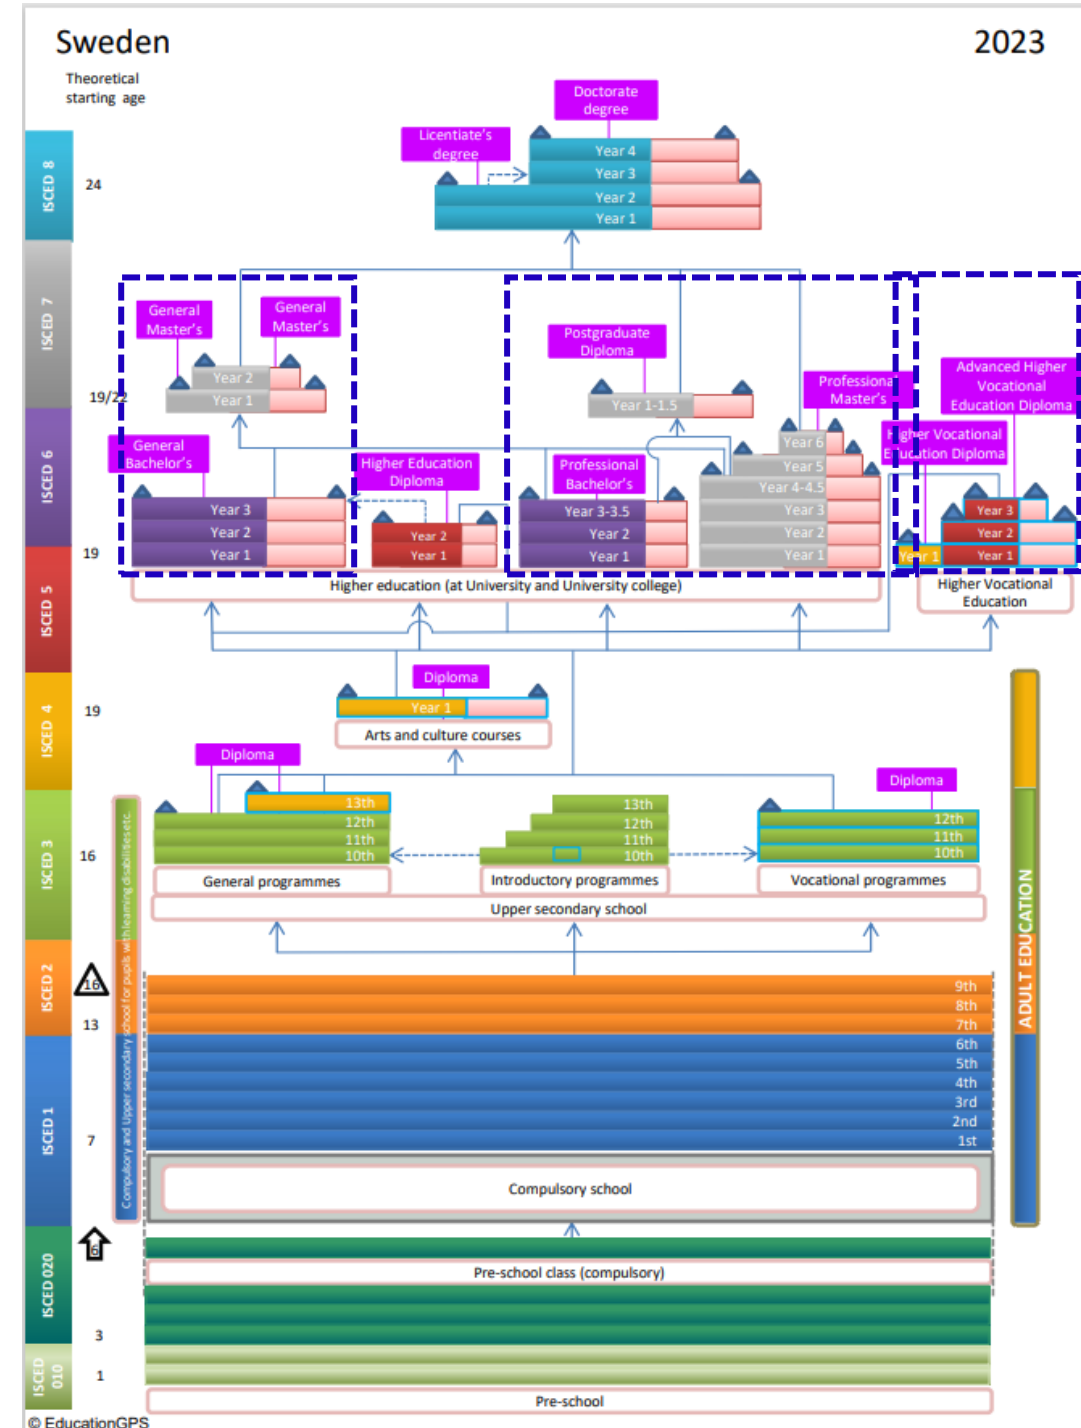

Division of tertiary education into general and professional orientation

Three types of education

- University and University college
 - General Bachelor's and Master's
 - Professional Bachelor's and Master's
- Higher Vocational Education

How to decide - proposals

- Type of institution combined with field of education
- Third category – sector oriented
