

# Serbia Innovates

supported by USAID

## Overview

- Bolstering innovation potential by creating new economic models and models of cooperation
- Strengthening the foundations of further development, competitiveness, and export potential of Serbia
- Creating an environment based on knowledge and trust, value creation and synergy

## Key Challenges

Unused innovation potential

- Lack of connectivity among key stakeholders
- Insufficient funding and investment
- Talent emigration
- Lack of success stories

## Solution

Implementation of supercluster methodology

- One-year testing period with four consortia selected
- Providing support for further development of the selected web3 and blockchain supercluster – Excellent3
