

USING AI FOR POLICY AND SYSTEM MONITORING

Exploring real-world AI applications

29 October 2025

Jan Otero, HCD Expert

Elma Aga, HCD Expert

Introduction

Agenda:

1. Brief Presentation of AI use cases
2. Activity: building a panel of AI use cases
3. Discussion
4. Conclusion

Objective of the working group:

Present, share and discuss different use cases of Artificial Intelligence in Policy and System Monitoring

AI use cases in dataflow

Data Collection

Data Analysis

Reporting

Dissemination

AI use cases in dataflow

Data Collection

Extract information from documents.

ETF Big Data

Retrieving online information on PC projects

Data Analysis

Qualitative analysis of interviews and focus groups

Reviewing coding – stata, R, python

AI Forecasting

Data Reporting

Produce summaries, references, glossary, abbreviation list and etc

ETF Policy Brief

Quality check

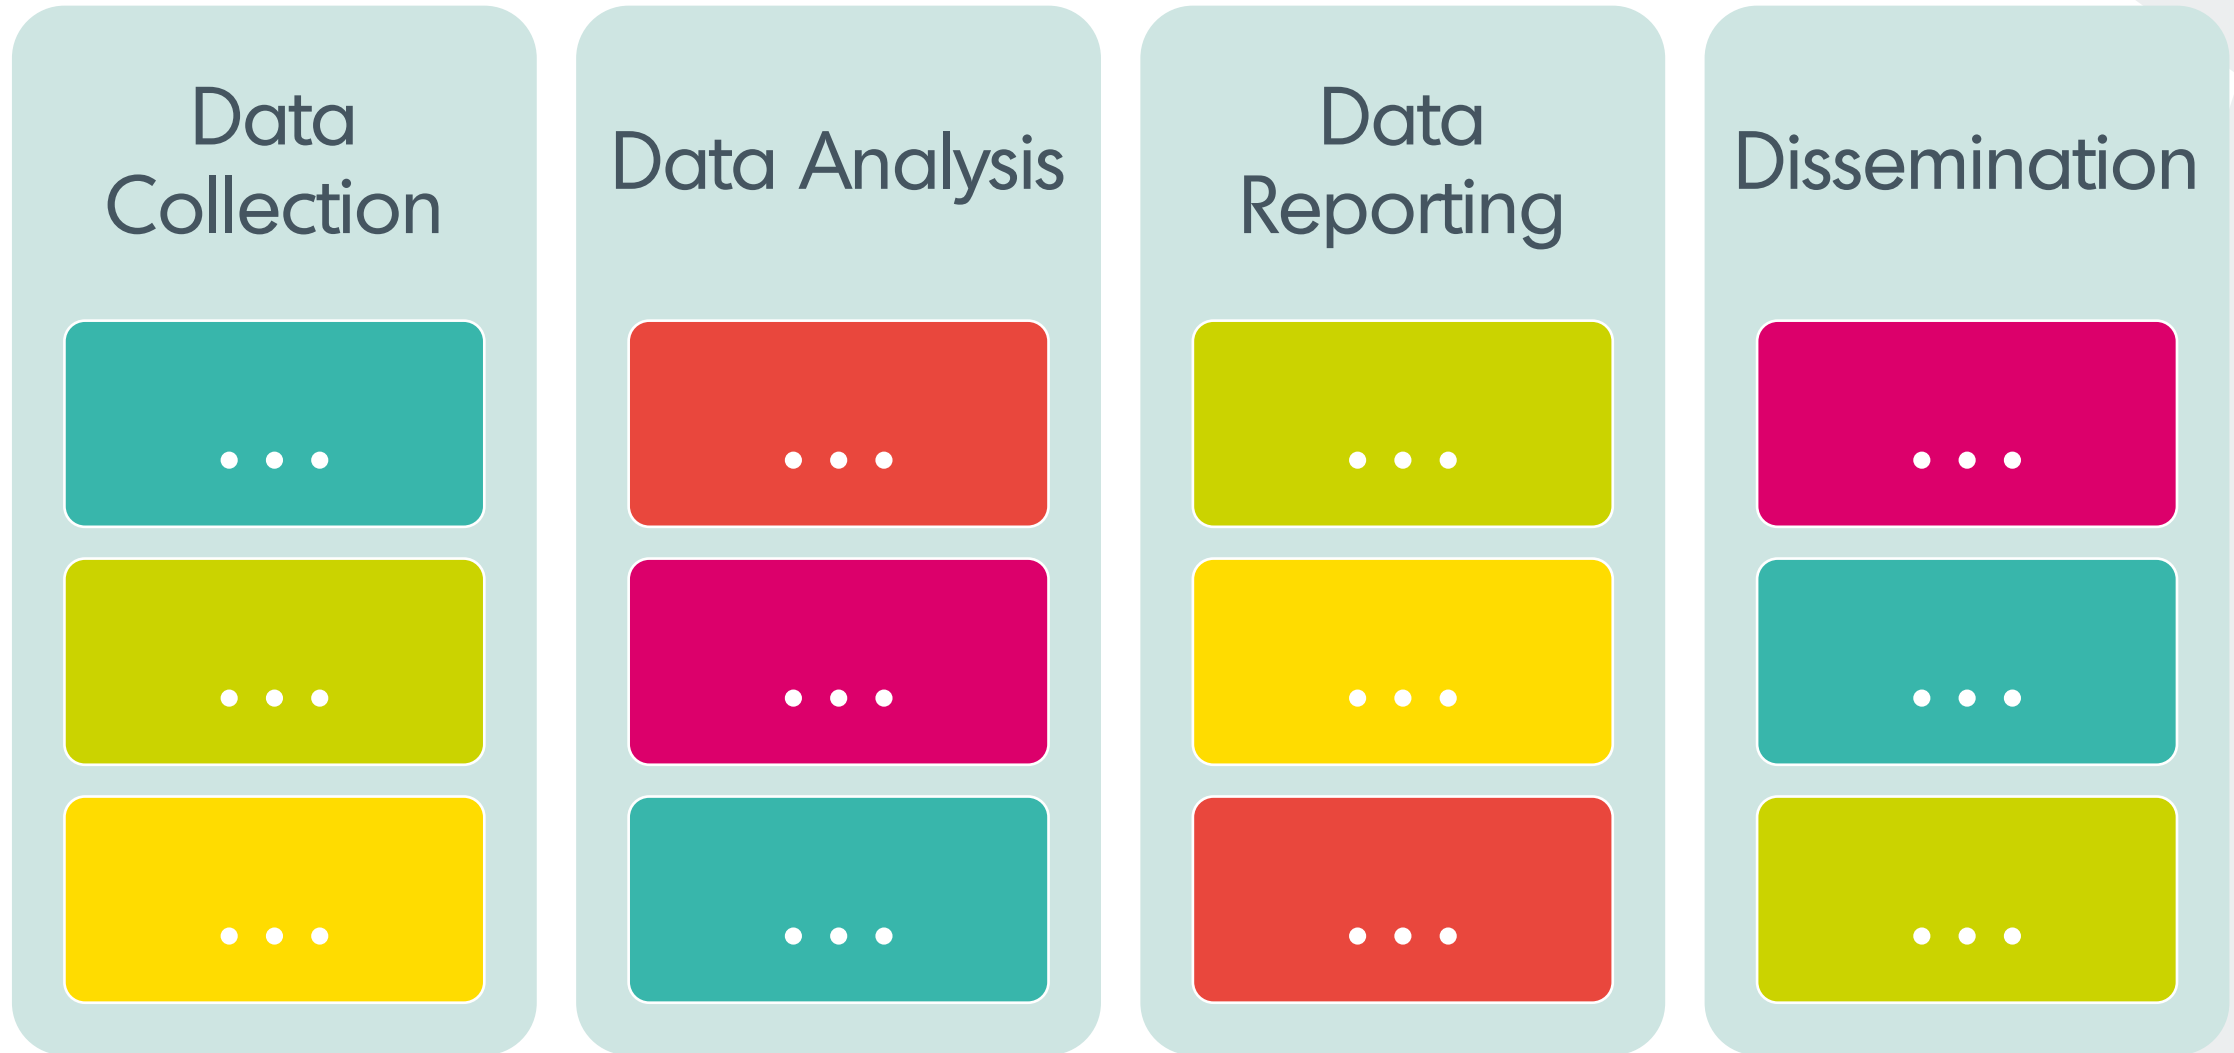

Dissemination

Chatbots

Translation

Social media posts

Activity: building a panel of AI use cases

Discussion

1. What patterns emerge from the shared practices?
2. What are the gaps or areas of potential?
3. What remains uniquely human in these processes?
4. How do we ensure ethical, transparent, and inclusive use of AI?
