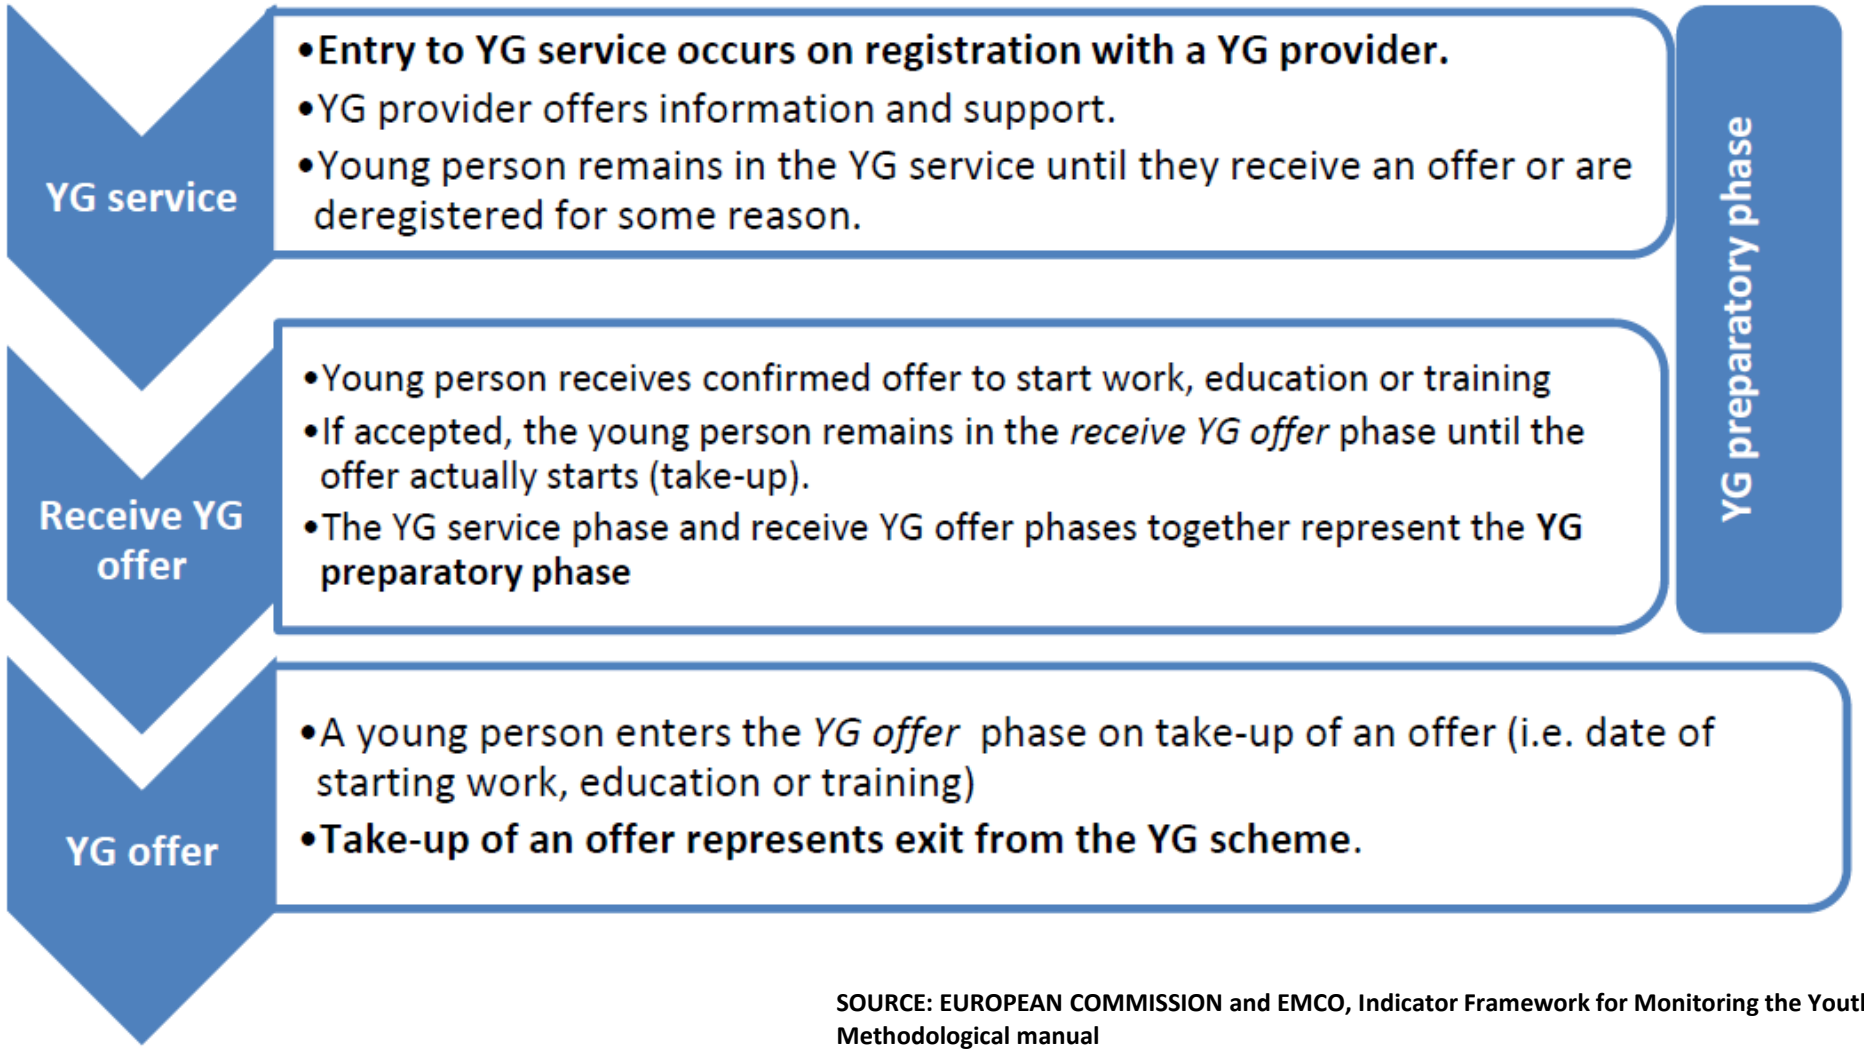
PHASES OF YG SCHEMES



SOURCE: EUROPEAN COMMISSION and EMCO, Indicator Framework for Monitoring the Youth Guarantee: Methodological manual

TYPOLOGIES OF MONITORING OF YG SCHEMES

Aggregate monitoring

- Macroeconomic indicators based on data from the Labour Force Survey (LFS).
- Intended to monitor the general situation of young people in the labour market.
- Indirectly, the effect of YG and other preventative measures.

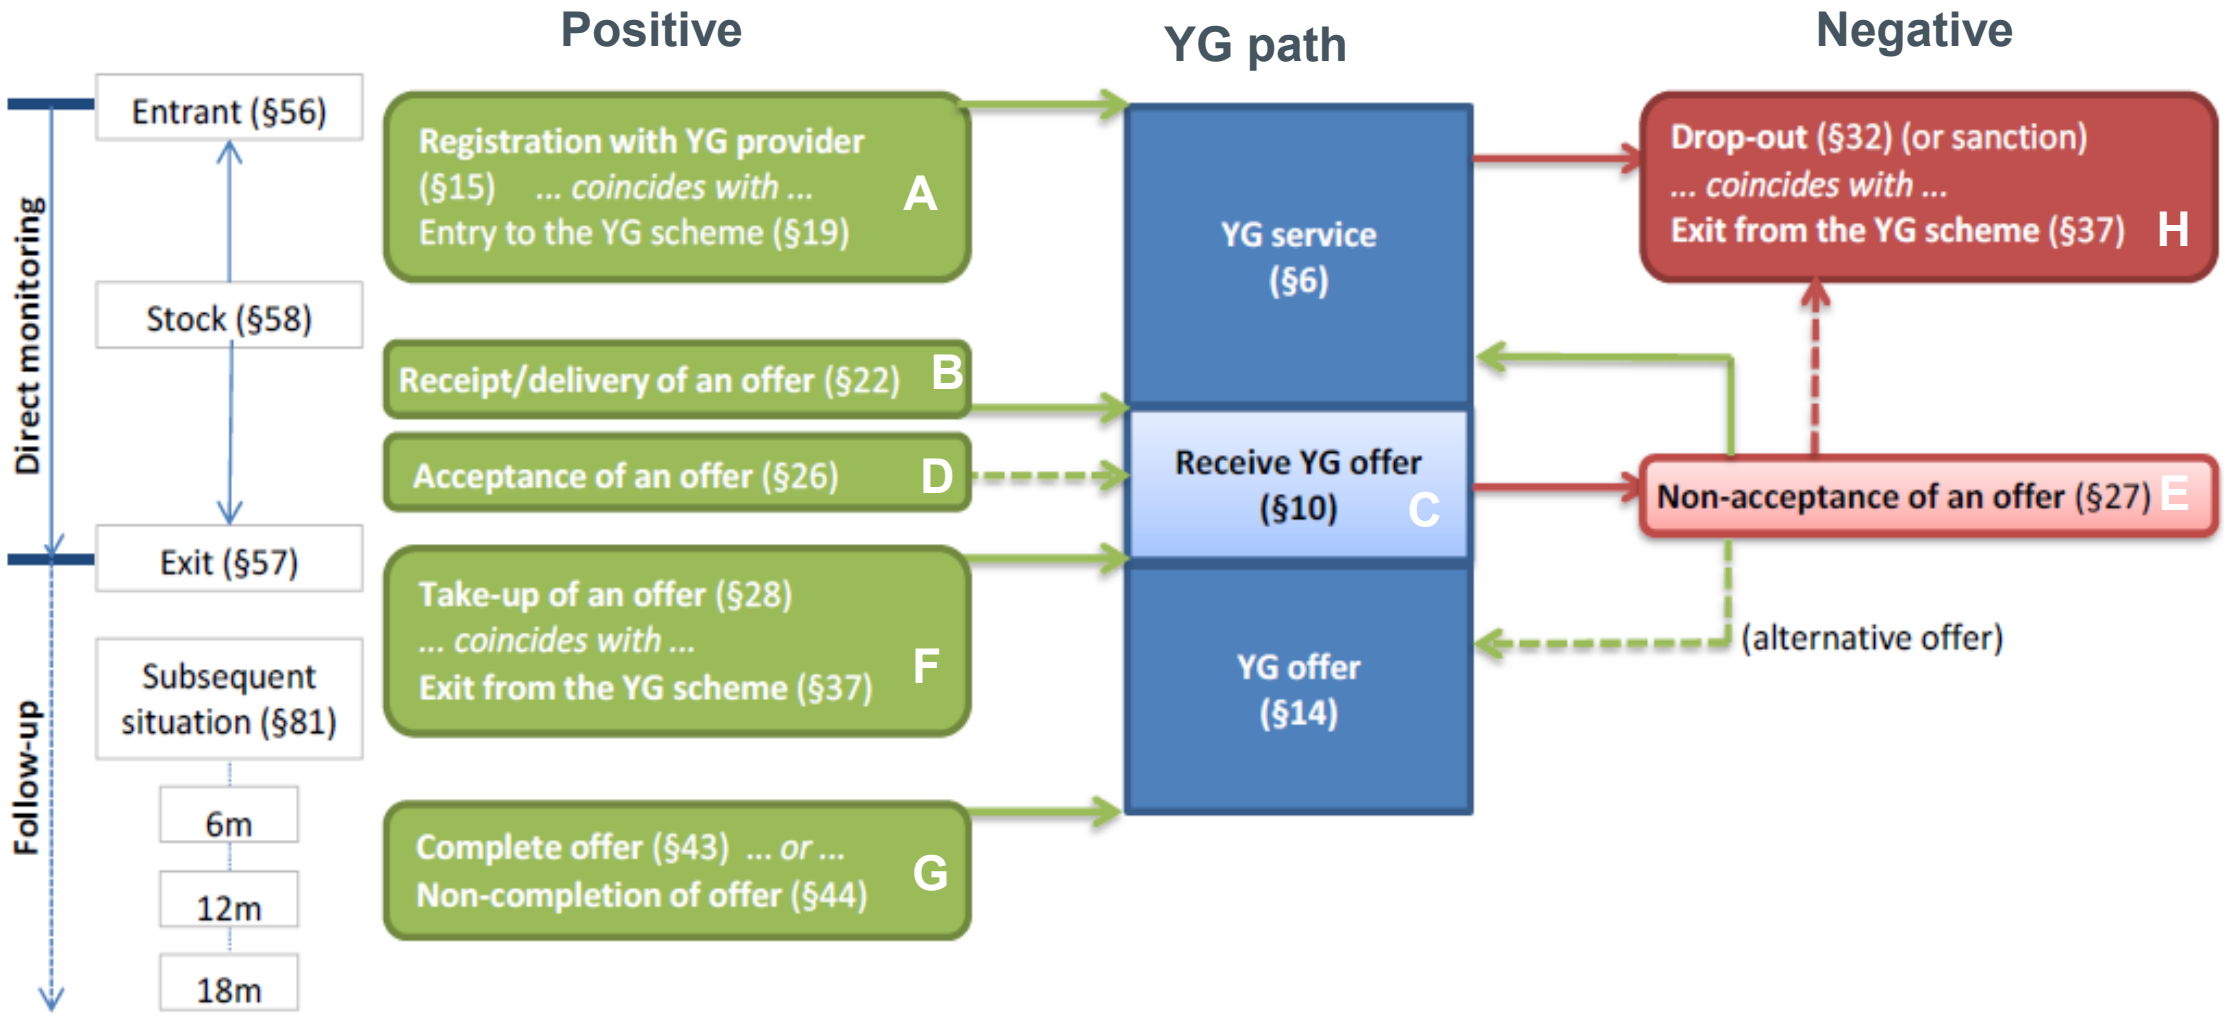
Direct monitoring

- Based on administrative data dealing with the flows of young people through the YG and immediate outcomes.
- Indicators that measure the direct impact of policy and the efficiency of delivery.

Follow-up

- For individuals who have received a YG offer.
- Indicators intended to assess the sustainability of labour market outcomes and contribute to the assessment of the quality of interventions.

KEY PHASES AND EVENTS OF THE YG AND MONITORING



MAIN VARIABLES CONSIDERED

ENTRANTS

Number of starts on the YG service phase within the reference period

STOCK

Number of persons registered in the YG scheme (in the YG service phase or the receive YG offer phase) at any point in time

EXITS

Number of exits from the YG scheme within the reference period.

Exits occurs on take-up of an offer or on deregistration before take-up of an offer

MAIN AND SUPPLEMENTARY INDICATORS

Direct monitoring indicators

- **Main indicator**: Proportion of young people in the YG preparatory phase beyond the 4-month target.
- **Supplementary indicator 1**: Positive and timely exits from the YG preparatory phase
- **Supplementary indicator 2**: Average annual stock of young people in the YG preparatory phase / NEET population (annual average)

Follow-up indicators

- **Main indicator**: Situation of young people at 6, 12 and 18 months after exiting the YG preparatory phase.
- **Supplementary indicator**: Situation of young people at 6, 12 and 18 months after taking up a YG offer **by type of offer**.

USE OF REPORTING – COUNTRY PROFILES (I)

ESTONIA

Context for implementation
