Digital Technology offers new and fundamental **solutions** to improve access and provision of Education and Training 

Digital Technology creates new and fundamental **threats** to improve access and provision of Education and Training
Integration of digital technologies requires significant educational innovation and implies a process of planning for pedagogical, technological and organisational change.

School managers have to ensure a strategic approach and an open and fertile environment.

Educators need to feel confident and competent in using and designing appropriate learning experiences for their learners.

Students needs to be actively involved.

The TPACK framework
SELFIE is a project of the European Commission (launched in October 2018)
SELFIE is a free, easy-to-use, online tool to help schools assess where they stand with learning in the digital age.

https://ec.europa.eu/education/schools-go-digital_en
SELFIE guides schools in EU & Eastern Europe in a self-reflection process towards an effective integration of digital technologies into teaching, learning and student assessment.
SELFIE is a multilingual online platform, including a dashboard for SELFIE School Coordinators.

It can be used by any school.
Who: school leaders, teachers and students, anonymously

What: online questionnaires (customizable) and dynamic online report
