National Qualifications Framework of the Republic of Moldova

GD no.1016/26.11.2017

NQF Department – main activities:

- Develop the National Qualifications Framework in Moldova in line with the EQF LLL;
- Implement and ensure the functionality of the National Register of Qualifications in technical and higher education;
- Monitoring the **CNC** implementation by training institutions;
- Responsible for the process of authentication, recognition and equivalence of study papers and qualifications obtained in the national education system and abroad;
- ENIC-NARIC National Center.

Achievements

- National Qualifications Framework of the Republic of Moldova, GD no. 1016/2017;
- National Council for Qualifications;
- Methodology for the development, revision and validation of qualification standards;
- 40 qualification standards for the fields of Education, ICT and Health
- Training and certification NQF experts - 3 training sessions with ETF support;
- **GD 1199/2018 Approval of the National Qualifications Register: NRQ Technical Concept, NRQ Structure and NRQ Functioning Regulations;**
- Equivalence of qualifications obtained in the education and training system up to the RM NQF approval, CD no. 1167/2018;
- It was approved by GD no. 1167/2018 Annex 3 to the NQF - access to studies, professional careers, recognition and employability;
- Dissemination of information with reference to NQF - 5 republican seminars and 7 workshops;
- The normative framework for carrying out the process of authentication, recognition and equivalence of study papers and qualifications and
- ENIC-NARIC network - information related to the national education system and cooperation with Member States.

National Register of Qualifications

National Register of Qualifications, significantly increases the transparency of the qualifications system in the country.

It will be used by different target groups:

- Individuals: learners, unemployed, employees
- Employers
- Educational institutions
- Career counsellors
- Recognition bodies

The role of the social partners in the development of the NRQ

- Social partners – take part in the elaboration, consultation, approval of the normative framework for the development of NQR
- The line ministries/authorities - coordinate the technical norm and concept of the NRQ
- Educational Institutions – will participate in the development, review and implementation of the qualification standards, will update the curricula conform to NQF provisions.

Priorities 2019 -2022

- National Register of Qualifications - implementation, assurance of functionality and recording all accredited programs by 2021
- Elaboration of the normative framework for the development of RM NQF, including recommendations of the European Commission
- Developing qualification standards based on learning outcomes aligned with levels NQF
- Implementation mechanisms for recognition and validation of skills acquired in non-formal and informal learning context
- Self-certification – NQF compatibility with EQF - Report / european best practices.
